3. LOG-ON as a UCSF External Supply Chain Partner

<https://ucsf-unifier.oracleindustry.com/bluedoor/partners>

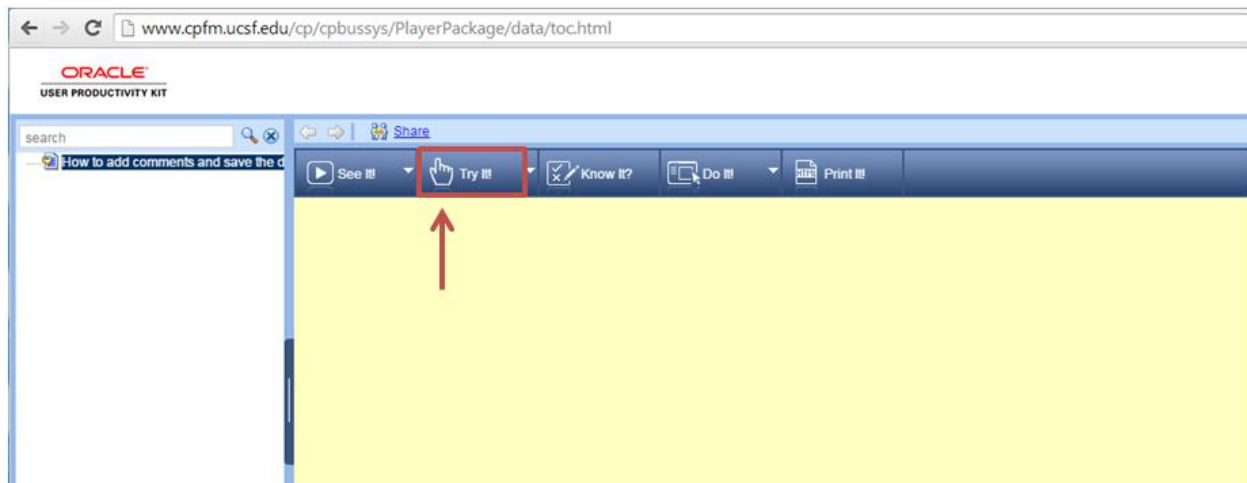

4. Online Tutorial (UPK) Directions

The Online Tutorial is a great way to get some “hands on” experience with Unifier. Use it to see videos of many processes, and to test your knowledge as well!

1. Click “See It!” to engage in a walk-through video of the process.

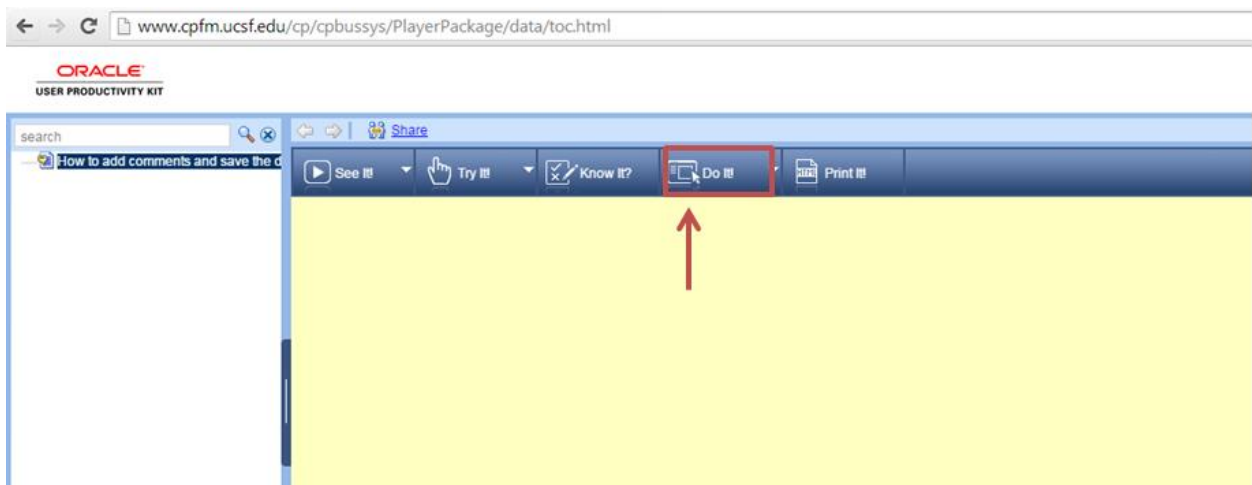

2. Click “Try It!” to be walked through the process on your own. Don’t worry, the system will help you along the way!

3. Click “Know It?” to undergo a knowledge test of the process! The system will walk you through the same steps, and will record your correct (and incorrect!) steps along the way, giving you a final score at the end. Unfortunately the system is a bit unforgiving, so if you click the wrong spot it will dock points. If you end up with a low mark, you’re still a winner in our books.

4. Click “Do It!” to engage in text directions that walk you through each step of the process.

5. And finally – Click “Print It!” to print out the text directions for each step of the process!
